Curves flow rate vs. pressure

### Hydraulic Parts

| Wetted Parts             | Standard Materials | Upon Request                                     |
|--------------------------|--------------------|--|
| Pump Head                | PVDF*              | PP/AISI 316/ PTFE                                |
| Diaphragm                | PTFE               |  |
| Valves                   | FPM (Viton®)       | EPDM (Dutral®); Silicone; NBR; Ceramic; PTFE     |
| Sealings                 | FPM (Viton®)       | EPDM (Dutral®); Silicone; NBR; TFE/P             |
| Injection Valve          | PVDF/FPM (Viton®)  | PP/EPDM (Dutral®); Silicone; NBR; Ceramic; TFE/P |
| Foot Filter              |                    |  |
| Suction/Bleeding Tubings | PVC                | PVDF/PTFE/PE                                     |
| Delivery Tubing          | PE                 |  |

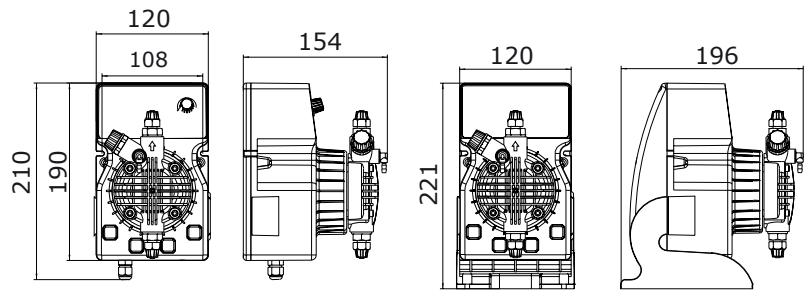

\*For 2 l/h - 20 bar is PP (PVDF upon request)

### UK - Stroke length adjustment

Upon request manual adjustment of stroke length for DLXB version

### Common Features

Wall mounted DLX or foot mounted DLXB dosing pumps • Anti-acid plastic casing IP65 protection • Pump supplied with manual air bleed pump head • Level control setting (supplied without probe): -/M Series (-/AD Series upon request) • Suction height: 2 m • Max pulse/minute: 150 • Standard power supply: 230V - 50/60Hz • Optional 110V - 50/60 Hz, 24V 50/60Hz, 24Vdc, 12Vdc.

### Materials

Pump Head: PVDF, upon request PP and PVC • Diaphragm: PTFE • Valves: FPM (Viton) lip valve, upon request other elastomers as EPDM (Dutral), NBR (Nitril) and Silicone. Available ball ceramic valves (PTFE upon request) • Connections: 4x6 mm • Foot filter: PVDF-FPM (Viton) • Injection valve: PVDF-FPM (Viton) • Tube Kit: 2m + 2m PVC crystal suction and bleeding hose ; 2m PE delivery hose.

### MA/AD

Analogue dosing pump • Manual with flow rate adjustment 0÷100% and 0÷20% with double regulation scale • Available with level control - MA/AD+LIV (Supplied without probe).

### MA/MB

Microcontroller dosing pump • 7 digit display • Manually adjustable flow rate from 0÷100% and 0÷20% • Level control and Flow Sensor setting (supplied without probe) • Available without flow sensor.

### VFT/MBB

Proportional dosing pump • Operating functions: Manual: manual - flow rate adjustment from 0÷100% • 1xn: for each pulse received, the pump will dose the number of injections selected by the operator. 1xn(M): for each pulse received, the pump will dose the number of injections selected by the operator. In the instance where a second pulse is received before the pump unit has completed the cycle, the pump retains this external pulse within its memory and re-starts at the end of the completed cycle • This is particularly suited for high concentration dosing • 1/n: the pump counts the number of external pulses received until reaching the value set by the operator, at which point the pump will dose one injection • TTL: Proportional mode by pulses input.

### MF/M

Multifunction dosing pump • Operating functions: Manual; 1xn; 1xn(M); 1/n; ppm, mA • Water meter input/mA input • Additional features: Flow sensor • Level control (without probe) • Relay Output • Buzzer • Clock • Timer.

### PH-RX-CL/M - PH-RX/MBB

Microcontroller dosing pump with pH, RX (mV), Free Chlorine control and regulation instrument • Backlight LCD display • ON/OFF - proportional operation modes • 0÷14pH; -1000 ÷ +1400mV; 0÷2ppm; 0÷20ppm; 0÷200ppm; 0÷2000ppm measuring range • 4÷20mA output • pH, RX (ORP) electrodes input (10 Tera Ohm) • Probe gain regulation 40÷80 mV/pH • Automatic (only for the PH-RX-CL/M model) or manual temperature compensation 0÷100°C • Hysteresis and delay programming of Set point • Display resolution: 0,01pH; ±1mV; 0,01ppm; 0,1°C • Level flow sensor input. Model PH-RX-CL/M have relay alarm output and are prepared to receive a contact from a proximity switch 2 wires NC.
